PARASITES FATTENING ON MISERY

PROFITEERING ON A LARGE SCALE FOUND BY TRADE COMMISSION

(By Associated Press.)
WASHINGTON, June 29.—Investigations have led to the conclusion that profiteering exists among American industries at the present time, due partly to the advantage being taken of "war pressure for heavy production" and in part to "inordinate greed and barefaced fraud," the federal trade commission announced today in a report sent to the senate.

Price fixing by the government, the report says, has tended to prevent the market running away, but at the same time strengthens the stronger factors in industry in their position, and enriches them by profits "which are without precedent."

FIRST SHIPMENT FROM THE DIVIDE

The first shipment of ore from the Tonopah Divide was made this week. The ore was taken out as a fair sample of the contents of the mine for the purpose of determining the best way of treating to secure the highest extraction. The shipment, which filled one carload, ran close to fifty tons. This will be the only tonnage sent out until it is known what the metallurgists of the Goldfield Consolidated Mining company have to report on the amenability of the ore to the flotation process. If this method should be successful the company is in a position to begin regular shipments but, it is not believed that any very great tonnage will be sent out until after a branch railroad line is built to the Divide country to connect with the T. & G. tracks near the terminus of the Belmont spur around Mount Oddie.
